## PROFILE

Dynamic Software Developer with 3 years of experience in backend development and a strong foundation in engineering principles. Proficient in Go and Rust, with a proven ability to design and implement scalable RESTful APIs and backend services. Committed to producing a clean, maintainable code and optimizing performance through rigorous testing and collaboration. Passionate about leveraging technology to address real world challenges, demonstrating a keen interest in continuous learning and professional growth in the software development field.

---

## PROFESSIONAL EXPERIENCE

2024 — Present      Software Developer, Bid Battles

- Designed and implemented scalable backend services and business logic in Go.
- Developed comprehensive unit and integration tests to enhance system reliability and maintainability.
- Optimized database queries and API performance in collaboration with cross functional teams.
- Contributed to continuous integration and deployment workflows to streamline release processes.
- Managed and executed tests for backend services to ensure high quality deliverables.

2023 — 2024      Freelance Software Developer

- Designed and developed web applications tailored to client needs, enhancing user experience and functionality.
  - Engineered RESTful APIs, implemented JWT authentication, and frontend solutions using Go and NextJS.
  - Collaborated with clients to define project requirements and troubleshoot technical issues, ensuring timely delivery of solutions.
  - Conducted code review and optimized performance through testing and debugging.
  - Engaged in continuous learning to stay updated with industry trends and technologies.
-

---

## TECHNICAL SKILLS

Go	Bootstrap
Rust	HTML
Python	CSS
JavaScript	PostgreSQL
Gin	SQLite
GORM	NextJS
REST APIs	JSON handling

---

## PROJECTS

### Blog Application (Go + NextJS)

Developed a full-stack blog platform with Go (Gin GORM) backend and a NextJS frontend. Implemented JWT authentication, Swagger documentation, and CRUD operation for users, posts and comments and reactions.

### Message Site

Created a simple messaging web app that allows users to send and view message in real time demonstrating backend logic, and frontend interaction.

### CLI Calculator

Built a command-line calculator supporting multiple arithmetic operations, focusing on modular code design and input validation.

---

## EDUCATION

B.Eng. Metallurgical and Materials Engineering, University of Lagos

---
